

Course Overview:

The Emergency Evacuation Procedures course provides the learner with the necessary skills to successfully manage the emergency evacuation of staff, or a building, should an emergency arise. Emergency evacuation drills should also be conducted at least twice a year, to ensure that the company environment is prepared and ready to evacuate when the need arises. We assist with the real-life planning and conducting of these drills, should you require assistance.

Course Objective:

- Minimize duplication of emergency response plans at the same facility
- Develop a single Emergency And Rescue response plan per facility, eliminating confusion, which is critical for facility first responders
- Improve coordination between facility response personnel and local emergency personnel

Course Outline:

- Purpose of an emergency plan
- Evacuation procedures
- Preplanning
- Emergency Scene
- Zone sweep
- Types of emergencies
- Specification emergencies & response
- Communication Channels
- General Evacuation and duties
