

**Course Overview:**

This interactive course provides a comprehensive understanding of behavioral-based safety and how to develop a successful behavior based safety process

**Course Objective:**

During the exercises, discussions, case studies, and development of their own implementation plan, participants will have the opportunity not only to learn, but to apply their new understanding of behavioral-based safety. Delivered by trainers with years of experience in designing and implementing successful behavioral change processes, the concepts are presented in real-world terms.

**Course Outline:**

- Principles of behavioral-based safety (BBS) processes
- Designing a customized BBS process to fit your management system and standards
- Identify continual improvement metrics and opportunities
- How to integrate your BBS process into other initiatives (Integrated EH&S systems, VPP, ISO, etc.)
- How to implement the BBS process in a way that builds commitment throughout the organization
- Identify the potential roadblocks to success, and develop a plan to deal with each
- Pinpointing and designing effective BBS audits
- Making successful BBS audits
- Potential problems and how to avoid them
- Developing a BBS project plan

**Who Should Attend:**

- Safety professionals and managers
- All levels of management
- Front-line supervisors

**Training Language:**

Eng/Ar

**Training Methodology:**

- Presentation & Slides
- Audio Visual Aids
- Interactive Discussion
- Participatory Exercise
- Action Learning
- Class Activities
- Case Studies
- Workshops
- Simulation
