

Course Overview:

A greater understanding of the measuring equipment can improve the performance of the delegate and this in turn will improve plant performance. Better knowledge of how equipment is selected and how it is constructed and how it works also helps delegates to identify the cause of problems and prevent their recurrence. Hence, the economic benefits of properly trained and informed delegates can be readily quantified.

Course Objective:

To describe the principles behind the basics of selection, construction and operation of process, maintenance and control equipment.

Course Outline:

- Instrumentation Equipment
- Flow Measurement
- Level Measurement
- Temperature Measurement
- Control Principles

Who Should Attend:

All those working on process plants, power station and substation that are familiar with the general purpose of process measuring instruments, maintenance and control equipment.

Training Language:

EN / AR

Training Methodology:

- Presentation & Slides
- Audio Visual Aids
- Interactive Discussion
- Participatory Exercise
- Action Learning
- Class Activities
- Case Studies
- Workshops
- Simulation
