

Course Overview:

This seminar will emphasize awareness of project risk management to minimize project schedule overruns & improve project execution. Project management is all about the management of risks; the ability to seize opportunities, minimize threats and to optimize results. However, risk management is too often treated as a reactive process, or worse, not done at all. In this Project Risk Management course, you'll work through the proactive approach to both sides of risk: threats and opportunities. The approach is based on a clear understanding

Course Objective:

- Get an overview of the Risk Management Process
- Learn to identify risks that affect project quality, time & schedule
- Apply useful techniques to identify, analyze, mitigate and monitor risks in the project life cycle
