

Course Overview:

To enhance the participant's knowledge, skills, and abilities necessary to understand and apply recent techniques of well service engineering and operations

Course Objective:

- To know The functions of the well engineering department
- To know The cost implications and effectiveness of operations
- To use The right tools and materials commonly used
- To know The principal techniques, problems and solutions

Course Outline:

- Well Service Engineering Requirement.
- Decision action in services.
- Pre job assignment.
- On site - qualification.
- Post job requirements.
- On job procedures.
- Reporting & Documentation.
- Safety issues.
- Production logging.
- Purposes and objectives.
- Needs and requirements.
- Recording & Feed back.

Who Should Attend:

- Supervisors.
- Engineers.
- Operators.

Training Language:

English

Training Methodology:

- Presentation & Slides
- Audio Visual Aids
- Interactive Discussion
- Participatory Exercise
- Action Learning
- Class Activities
- Case Studies
- Workshops
- Simulation
